

# Day in the Life: Healthcare

Zebra for Android devices provide the visibility you need to enhance patient safety, improve operational efficiency and optimise your IT investment.

1

## HELP IS ALWAYS AT HAND

A patient in triage passes out. Nurse Jackson reaches for her Zebra for Android MC40-HC device and quickly summons a team using Workforce Connect. Thus it's quick and simple to communicate with colleagues via voice or text.

2

## JUST-IN-TIME INFORMATION

Doctor Jones checks her MC40-HC to see if some urgent blood tests have been processed. The large touch screen makes it easy for her to find and evaluate the results, and she can take action much sooner than if she had relied on the old desktop PC-based system.

3

## BETTER RECORD KEEPING

From goods in to the laboratory and the bedside, data collection needs to be processed quickly and accurately for the best patient outcomes. With Mobility DNA's SimulScan application on their MC40-HC devices, staff can digitise entire documents – with multiple barcodes, images, check boxes and lines of text – in just one scan.

**DISINFECTANT-READY,**  
with enterprise-class durability

**EASE OF USE**  
helps to avoid  
treatment  
errors

**LARGE TOUCH**  
display for clarity  
and fewer  
input errors

**USER-REPLACEABLE**  
**BATTERY** –  
for shift-long  
availability

**POCKET-SIZED,**  
tablet-style user-  
friendly styling

**ADVANCED POINT-AND-SHOOT SCANNING** –  
1D, 2D, damaged or  
obscured codes

**VERSATILE VOICE**  
communication,  
including  
push-to-talk

**8 MP CAMERA**  
for rich  
photographic  
intelligence

## ZEBRA FOR ANDROID MC40-HC

# Day in the Life: Healthcare

Zebra for Android devices provide the visibility you need to enhance patient safety, improve operational efficiency and optimise your IT investment.

4

## EASY TO USE FROM DAY ONE

Both clinical and non-clinical staff can use Zebra for Android devices right away, with minimal training, because its familiar Android interface is simple and intuitive to use.

5

## BUILT FOR MEDICAL ENVIRONMENTS

Nurse Jackson drops her Zebra for Android device on the hard floor, but it's okay. The MC40-HC is built to withstand long drops, knocks, dust, water – and constant sanitizing.

6

## PROTECTING PATIENT DATA

With her MC40-HC, nurse Jackson can view patient data wherever she goes in the hospital. Zebra has injected an extra layer of security into Android, so all Zebra for Android devices are secure enough to handle and transmit sensitive data.

## ZEBRA MOBILITY DNA IN HEALTHCARE

The software ecosystem that gets Android ready for anything the healthcare environment demands.

## SIMULSCAN

Work faster and ensure successful patient outcomes, with rapid document capture and multiple barcode scanning in one scan.

## ALL-TOUCH TERMINAL EMULATION

A touch-friendly interface – no more 'green screen' – that gives users access to multiple hosted applications from one device, helping to boost productivity.

## WORKFORCE CONNECT

Unify clinical and non-clinical staff with close integration of devices and systems, and easier collaboration with voice and messaging functions.

## SWIPE ASSIST

Allow efficient, accurate working, capturing patient barcodes, documents and photos at the touch of a virtual on-screen button.
